Global CO₂ emissions

Trajectory to net zero
has to start now to keep
warming below 1.5°C

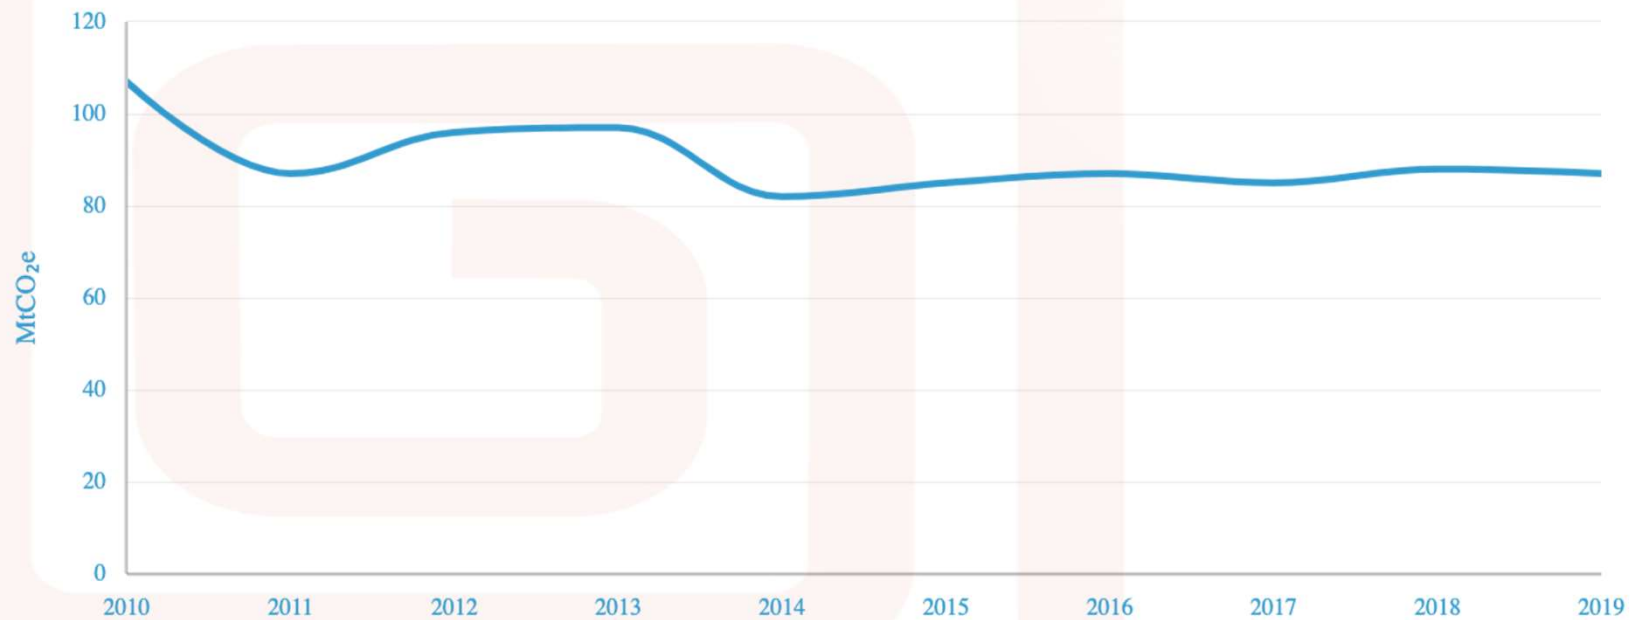

IPCC 2018 Special Report

2018 IPCC Report

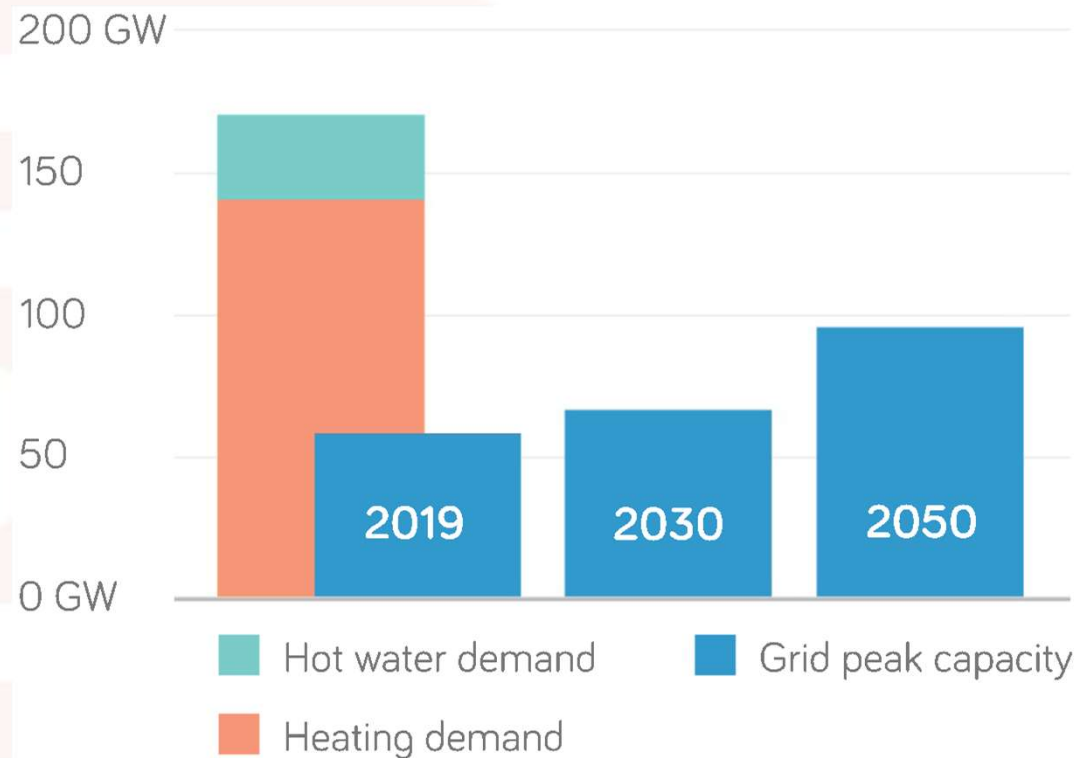

UK CO₂ emissions from buildings

Limitations on the grid

Peak Load Limitations

Even by 2050 we are not projecting to have enough grid peak capacity to meet the demand currently met by gas

And it's not just about energy!

SDF programmes

We help to set-up self-financing programmes which then spin-off to become independent organisations:

Market Leading Programmes
