Vulnerability Risk Assessment

Young people can be particularly vulnerable to recruitment into gangs and involvement in gang violence and exploitation. This vulnerability may be exacerbated by vulnerability/risk factors in an individual's background, including violence in the family involvement of siblings in gangs, poor educational attainment, poverty and / or mental health problems. There are links between gang-involvement, criminal exploitation and young people going missing from home or care. Factors which can draw gang involved young people away from home or care into 'going missing' are linked to their involvement in carrying drugs along 'county lines' There may be gang associated 'relationships' that are sexually exploitative which can be strong pull factors for girls becoming involved.

TOTAL (each tick = 1 maximum 35)		/35

0- 7	1.Emerging vulnerability/risk	No history or evidence at present to indicate likelihood of vulnerability/risk from behaviour. Consider inclusion on 'watch and wait' list
7- 14	2.Low vulnerability/risk	No current indication of vulnerability/risk but young person's history indicates possible vulnerability/risk from identified behaviour.
14-21	3.Medium vulnerability/risk	Young person's history and current behaviour indicates the presence of vulnerability/risk but action has already been identified to moderate the vulnerability/risk.
21-18	4.High vulnerability/risk	The young person's circumstances indicate that the behaviour may result in a vulnerability/risk of serious harm without intervention from one or more agency.
28-35	5.Very high vulnerability/risk	The young person will commit the behaviour as soon as they are able and the vulnerability/risk of significant harm is considered imminent.
